

## SB18-206 Compliance Reporting

In compliance with SB18-206 and Colorado Revised Statute 23-1-113.5, the current admissions/enrollment report is submitted for Colorado State University. The numbers demonstrate that nonresident students in the admissions process are not displacing Colorado residents.

All applications submitted to Colorado State University are reviewed holistically, beyond just GPA and/or test scores. Other factors considered may include employment, leadership activities, involvement in clubs or sports, community service activities etc. Additionally, performance trends are considered; the GPA of a student increased throughout high school but overall was only marginal. Student essays and letters of recommendation are also considered.

Chart 1 displays the admissions rate and yield rate by residency.

Chart 1.

As shown in Table 1, thirty-four percent of the FA20 entering class was nonresident (excluding international students), in keeping with our land grant heritage. The average HS GPA was 3.71 for nonresidents and 3.70 for residents.
